**Re: Notice of *Ex Parte* Presentation
ET Docket No. 18-39**

Dear Ms. Dortch:

Sensible Medical Innovations Ltd. ("Sensible"), through its counsel, submits this letter concerning the number of proposed frequency steps in its request for a limited waiver of the FCC's Part 15 rules governing ultra-wideband medical imaging devices. Sensible seeks these waivers to market a medical device that uses dielectric sensing to provide non-invasive measurement of lung fluid (the "ReDS System").¹

Sensible stated in its reply comments to this proceeding that the ReDS System will use "approximately 16 steps between 1005 MHz and 1709 MHz."² Sensible clarifies here that the ReDS System will only use the 16 previously identified frequencies, as modified,³ or a subset of no less than 14 of these frequencies. Sensible would abide by a waiver condition requiring the same.

Please direct any questions regarding this submission to me.

Respectfully submitted,

/s/ Michele C. Farquhar
